

IQueue< T >

```
graph BT; NaiveQueue[NaiveQueue< T >] --> IQueue[IQueue< T >];
```

The diagram illustrates a class hierarchy. At the bottom is a white box labeled 'NaiveQueue< T >'. A red arrow points vertically upwards from this box to a gray box at the top labeled 'IQueue< T >'. This indicates that 'NaiveQueue< T >' inherits from or implements 'IQueue< T >'.

NaiveQueue< T >
